Asas

Asas... A Comprehensive, Advanced and Secure System

Asas is an ERP with the latest techniques and best practices, designed to fit the Saudi market in both Public and Private sectors, to be one of the national enablers towards digital transformation through the automation of finance, human resources and supply chain processes.

An advanced SaaS solution for Enterprise planning resources, which includes interconnected systems that operate as an integrated system with a common database serving all sections and departments of the organization. The system deals with the employees of the organization as part of the business cycle to enable organizations to use and manage their information, physical and human resources with great effectiveness and high efficiency.

Asas provides a new concept of the digital services through many solutions to be implemented:

Software as a Service   Platform as a Service   On-premise Solution

Target Audience

Government Authorities   Private sector
